It's fast paced and the characters are entertaining. The dialog is a riot. Quite addictive. Enough to cause one to overlook the myriad of technical errors. It's clearly written by a man and from a man's perspective. From how he views the world, to how he views women and how he thinks we view each other, so ladies be prepared. As a medic and a survivalist, I want to grab him and shake him at times. The errors in some of the situations are glaring. At other times...I just want to tell him...I get it already...it's a truck...a black pick up...or a F-150....I don't care beyond that....but like I said...a man wrote it. It's clearly an ebook...with all of the weak editing that goes along with such...but...I am of the opinion that ebooks are going to ruin publishing. Still...Will and Danny are a riot. Lara is an example of what women can become. So is Gabby. but good grief. Stop with the "That's a Glock" the only reason she thinks it's a Glock is because you taught her Glock's....shoot a bunch of different 9mms and she wouldn't be able to tell the difference. the woman didn't know the different end of a gun before this and you never shot any different hand gun around her much less any different semi auto much less and different 9mm...It just makes her sound stupid. Like I said...annoying....I don't know if Sisavath is trying to make women sound stupid with that, or just the character, or if he just doesn't know any better....he makes mistakes that are much more deeply imbedded and not as easy to pick out if you don't know what you are looking for....A fully prepped bunker capable of supporting over 100 people for 50 years, with a mini hospital, a garden with huge grow lamps etc, but no vit.

I enjoyed this one as well and am looking forward to the next one acknowledging it is fiction and there will be flaws (in real world, even 'Rangers', are affected by multiple gunshot wounds! It is not even the bleeding that would be concerning, but the follow on infection!). The storyline does expand a lot in this one so it is worth the read. Some irks: If Lara says one more time "I am a third year medical student" someone needs to punch her in the noggin'. It is the end of the world. Vampires have killed everyone. No one is going to get too technical with you if you call yourself a doctor and you were only in your third year of medical school when the Purge went down. Names - The majority of the names in the book are under two syllables - new characters, old characters - and they are all relatively indistinguishable from one another. It makes it hard to keep track of the characters (even though 90% of any new introduced characters die) with generic names like Gaby, Nate, Josh, Will, Danny, Benny, Roy, Lara, Jen, Amy, Mike, Mason, Mac, Zoe, Mae, etc. The only exception in this book was Kellerson. It did not hit me until this book that darn near every character has a generic American 1-2 syllable name. *SPOILER ALERT - Sort of* You have your core group of characters: Will, Gaby, Josh, Blaine, Danny, Lara, etc who were all introduced in the earlier books. Everyone else who is introduced in the book dies. All other characters besides these core group are like Star

Trek "Red Shirts"...just people who tag along with the main characters just so they can die. It is true...all Red Shirts.Weaponry - if you know ultraviolet flood lights destroys the vampires by acting as artificial sun...during supply runs...
